

Hussnain Bashir

AI Full-Stack Developer

hussnain.bashir.go@gmail.com | (+92) 307-5345242 | Lahore, Pakistan

LinkedIn | GitHub

PROFILE

AI/ML and Full-Stack Developer specializing in building end-to-end intelligent systems, from fine-tuning LLMs and deploying computer vision pipelines to developing blockchain DApps with Solidity. Highly proficient in Python, React.js, FastAPI, and C++, with a proven track record of leveraging AI, Web3, and automation to architect scalable, production-ready solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, Solidity, SQL
AI / ML: PyTorch, LightGBM, Dlib, YOLOv8, OpenCV, Flan-T5, Hugging Face, Scikit-learn, Pandas
NLP / RAG: NLP pipelines, RAG, LangChain, Vector DBs, Embeddings, Transformers
Agentic AI: AI Agents, Agentic Workflows, AI Automation, n8n, Prompt Engineering
Full-Stack: React.js, TypeScript, FastAPI, Node.js, REST APIs, WebSocket
Blockchain: Solidity, Smart Contracts, DApps, Web3.js, Ethers.js
DevOps / DB: Docker, Nginx, Vercel, PostgreSQL, SQLite, Git

CERTIFICATIONS

AI & Machine Learning · NAVTTC
Python Essentials 1 · Cisco Networking Academy
JavaScript Essentials 1 · Cisco Networking Academy
Back-End Web Development · LinkedIn Learning
Problem Solving in C++ / Python · DSA Practice
Intro to SQL · Kaggle
Advanced SQL · Kaggle

PROJECTS

TechPhantom AI Campus Management System

January 2026 – Present

[Python](#) · [FastAPI](#) · [React.js](#) · [YOLOv8](#) · [Dlib](#) · [Docker](#) · [WebSocket](#) · [JWT](#) · [Live Demo](#)

- Engineered an **enterprise-grade attendance system** replacing manual roll calls with live facial recognition using **Dlib 128D embeddings** and YOLOv8 person detection.
- Architected a **secure FastAPI backend** with JWT Role-Based Access Control (RBAC) and a WebSocket-powered kiosk deployed via Docker and Vercel.

SupplyMind

2026

Predictive Supply Chain Intelligence

[Python](#) · [PyTorch](#) · [FastAPI](#) · [React](#) · [Agentic AI](#) · [LightGBM](#) · [TFT](#) · [GitHub Repo](#)

- Engineered a **multi-model ML pipeline** combining Temporal Fusion Transformers (TFT), LightGBM with SHAP explainability, and LSTM Autoencoders to predict stockouts 2–4 weeks in advance.
- Architected an **autonomous agentic mitigation engine** featuring 3-tier governed execution with financial guardrails (<\$85k authority) and immutable audit logging for full human oversight.

TapConnect

May 2026

Networking App

[Kotlin](#) · [Android](#) · [GitHub Repo](#)

- Developed a **native Android application** to streamline networking at conferences and meetups by eliminating manual profile lookups.
- Integrated seamless contact-sharing features enabling users to instantly exchange social and career profiles via a single tap.

SmartSummarize

April 2026

AI Email Summarizer

[Python](#) · [Flan-T5](#) · [FastAPI](#) · [Hugging Face](#) · [Chrome Extension](#) · [GitHub Pages](#) · [Live Demo](#)

- Fine-tuned a **Google Flan-T5 model** on the AESLC email dataset for abstractive summarization, cutting reading time by an estimated 70%.
- Shipped a **FastAPI inference backend** to Hugging Face Spaces and crafted a Chrome extension that injects a one-click summarize button into the Gmail interface.

Automata Converter

July 2025

Theory of Automata Educational Tool

[JavaScript](#) · [HTML/CSS](#) · [Finite Automata](#) · [GitHub Pages](#) · [Live Demo](#)

- Built an **interactive web-based academic tool** for CS students enabling visual NFA-to-DFA conversion and regular expression matching with zero backend dependency.
- Crafted an intuitive UI that simplifies complex automata concepts, serving as a **supplementary learning resource** for university coursework.

EXPERIENCE

Student Life Ambassador (Summer Internship)

June 2023 – August 2023

[Lahore Garrison University \(LGU\)](#) · [Lahore, Punjab](#)

- Guided **50+ incoming students** through the ByteCamp program by leading weekly advisory sessions on academics, career growth, and campus life.
- Organized **15+ community events** that helped over **200 new students** acclimate to university culture and build lasting peer networks.

WORKSHOPS & EVENTS

- DevFest 2024 & 2025** – Google Developer Group · Lahore
- Build with AI Workshop** – Arbisoft · 2026
- Build with AI Workshop** – FAST NUCES · 2026
- TechTehwar** – Lahore Garrison University
- Blockchain Event** – Institute for Art & Culture · Lahore

EDUCATION

Bachelor of Science in Computer Science

Institute for Art and Culture (IAC) · Lahore, Punjab

Concentration: Artificial Intelligence · ML · NLP · Web Applications
